

# FOCUSING ON OUR CUSTOMER

Our mission is to be the premier provider of dewatering, one-pass trenching, bypass pumping and power generation equipment and services across a variety of industries. Our knowledgeable staff shares our commitment to customer satisfaction through experienced application of equipment, product education, safe operations and superior service aimed at cultivating long-term relationships built upon honesty, integrity and unparalleled dependability. These ideals are rooted in our foundation, which began in the drilling industry in 1988 and has evolved under the second-generation leadership of Gino Mersino into a multi-faceted corporation able to engineer and deploy a full-service approach to groundwater control.

With origins in contractor dewatering, we understand the value of reliable pumping equipment and moved to control our own destiny with the idea of developing a pump design and manufacturing company and making Global Pump\* a reality in 1997. Global Pump designs, tests, manufactures, services, sells and rents equipment to customers around the world from factory-owned Global Pump and Mersino Dewatering branches. In addition to our company-owned locations, Global Pump continues to expand its footprint in locations across the globe with a reliable network of authorized distributors.

### **DEWATERING SERVICES**

The impact of groundwater on a construction project can be significant. You require a dry, safe worksite with no downtime and no excuses. With our full spectrum of dewatering solutions, Mersino is the only dewatering contractor in North America qualified to provide every solution available to solve your groundwater problems. Our dewatering services include:

- Deep Well
- Wellpoint
- Sock Tile Trench
- Eductor Systems

# ONE-PASS TRENCHING

Mersino has invested in highly precise equipment to perform one-pass trenching services. Laser guides and GPS systems allow for accurate installation along irregular grades for maximum efficiency.

Our one-pass trenchers are effective at installing:

- Slurry Cut-Off Walls
- Goundwater Collection Systems
- Permeable Bio-Walls
- HDPE Barrier Walls

# **BYPASS PUMPING**

Our position as a vertically integrated company allows us to offer unparalleled pumping equipment and services. We proudly use our Global Pump line of cost-effective and efficient pumps available through our network of company-owned locations and authorized distributors to provide the following bypass pumping services:

- Sewer Bypass
- Industrial Pumping
- Construction Pumping
- Emergency Response

# POWER GENERATION

Our generators are capable of 24-hour operation using fuel cells for extended time and/or remote location requirements.

Easily and reliably power your seasonal or emergency needs, including:

- Jobsite Trailers
- Special Events
- Backup Power
- Emergency Power

# PROVIDING RELIABLE EQUIPMENT

Through ISO 9001:2015-certified Global Pump, we offer a wide variety of economical, dependable and highly efficient dewatering pumps and jobsite equipment. Exceptional design and superior components assure that you receive the very best quality product for your investment. As the largest user of our own products, we ensure that our equipment is designed to stand up to a variety of conditions in a multitude of applications. Our commitment to quality and reliability includes rigorous testing prior to every shipment to ensure that your equipment will be in perfect working order when it arrives at your site.

# Trash Pump Series Standard and High Performance Trash

Global Pump Standard and High Performance Trash pumps are specifically designed to effectively handle a wide range of liquids from water and sewage, to sludge that can contain solids and other material. Global Pump Trash pumps, with advanced enclosed impeller design, provide a dependable, highly efficient solution in a completely automatic priming pump.

#### Features

Rugged, heavy-duty centrifugal pumps engineered specifically for portable application.

Available with a variety of priming systems, including Global's Auto Prime® automatic priming system (compressor-fed venturi priming) or a diaphragm priming system.

Dry running mechanical seal.

Hydrostatically tested pump casings to 50 psig (345 kPa) above the peak casing pressure.

Preset emergency shutdown protection and automatic level control through standard engine control.

#### Options:

Highway trailer or skid mounted.

Global Pump Environmental Box to separate and silence air exhaust and return liquid to the pump suction.

SoundGuard™ enclosure.

Fuel tank for extended run time.

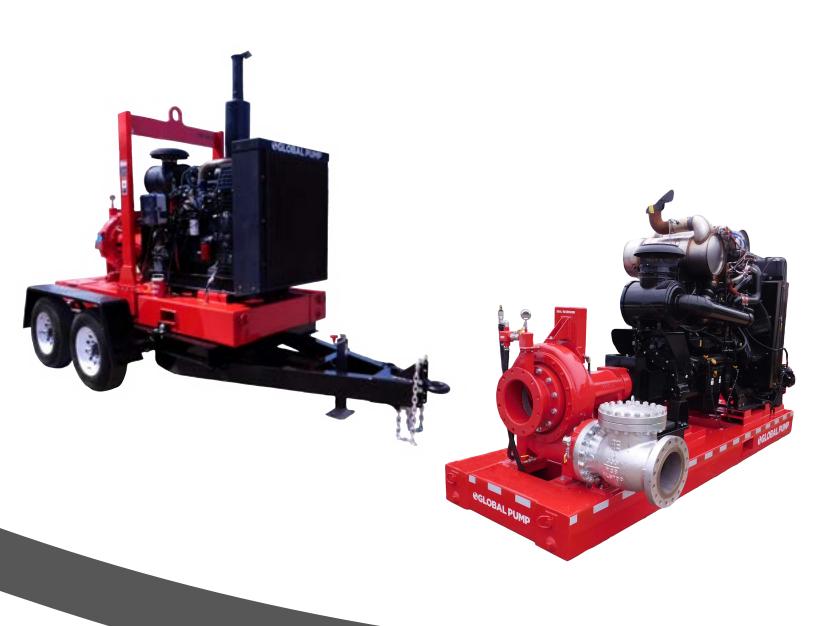

CD4MCu stainless steel for abrasion and corrosion resistance.

Fully guarded coupling.

# Wellpoint Pump Series

# Standard Centrifugal, Rotary and Piston

Global Pump Standard Centrifugal Wellpoint pumps are specifically designed to effectively handle the arduous requirements of wellpoint and underdrain dewatering systems where intermittent water flow and large amounts of air are encountered.

Global Pump Standard Rotary Wellpoint pumps are specifically designed for wellpoint and underdrain dewatering applications.

Global Pump's highly efficient, positive displacement, double piston dewatering wellpoint pump is designed for the demanding requirements of wellpoint dewatering, under drain sock dewatering, filtered water transfers, utilities, civil engineering, remediation and various construction applications.

# SoundGuard and SafeGuard

For applications where noise is a concern and emergency backup is a must, Global Pump proudly offers SoundGuard and SafeGuard enclosures.

# KEEP JOBS SAFE AND SOUND

Global Pump SoundGuard reduces noise level to no more than 68 db at 30 feet (9 m).

# SoundGuard

The optional Global Pump SoundGuard enclosure is made of 12-gauge Galvannealed-Steel (or optional stainless steel), double-sided-galvanized sheet panels insulated with fire retardant acoustical foam. Global Pump SoundGuard reduces noise level to no more than 68 db at 30 feet (9 m). Custom db levels are available to meet design requirements. Panels are removable for maintenance and repair. Lockable panel doors provide easy access to the pump, engine, priming system and controls for routine servicing, lubrication and fueling.

#### SafeGuard

The Global Pump SafeGuard backup system is ideally suited for operation in municipal or industrial applications where provision for electrical power failure or heavy duty equipment failure is necessary for essential pumping requirements. By monitoring water level in the wet well, the engine-driven standby pump will automatically start when needed, whether as a result of electrical power interruption or equipment failure, providing continuous unattended auto priming performance.

Corporate Brochure REV 004

# Submersible Pumps

High Pressure, High Volume, Trash and Dredging/Slurries/Solids

EFFICIENTLY PUMPING IN EXTREME CONDITIONS

# Trash/Water Electric Submersible Pumps

We sell and rent a full line of trash/water electric submersible pumps.

- Dewatering models feature three styles of abrasion resistant, high chrome steel impellers, and are ideal for applications where pumping muddy, mucky water is prevalent.
- Stainless steel models are designed for service in light acid or salt water applications.
- Grinder pump models are suited for applications where sewage or fibrous materials clog traditional pumps.
- Axial flow models are intended for high flow, low head applications where peak pump efficiency is required.

#### Slurries/Solids Submersible Pumps

Our electric or hydraulic heavy duty submersible agitator pumps are specifically designed for handling slurries with a high content of abrasive solids. Positioned as submersible dredge pumps for marine and energy sectors as well as in mining for minerals and other materials, these pumps handle slurries with up to 70% solids by content and specific gravity up to 1.7, with a capacity of up to 5,300 gpm (1,204 m³/h) and up to 275′ (84 m) of head.

With high chrome wear parts and double mechanical seals, the pumps are manufactured with exceptional structural quality to require infrequent maintenance.

# POWER GENERATION

Often times, your power generation needs are emergency in nature. Global Pump is on call 24/7/365 to respond to any situation. Our crews are well-trained to respond to hurricane, tornado and flood events, as well as restoration projects and all temporary power generation needs.

Global Pump's portable generators are designed for construction, industrial, oil and gas exploration, special events and emergency applications. With a perfect combination of reliability, user-friendly functions and superior quality, Global Pump's generators are the ideal, reliable option for rugged rental applications.

Our generators are available to you on standby, year round.
